Professional Summary

Innovative and detail-oriented Backend Software Engineer with 6+ years of experience designing, building, and scaling high-performance distributed systems. Passionate about writing clean, maintainable code and leveraging cloud-native technologies to deliver world-class products. Proven track record in microservices architecture, API design, and DevOps practices.

Technical Skills

- **Languages:** Python, Java, Go, Node.js, SQL
 - **Frameworks:** Spring Boot, Django, Express.js, FastAPI
 - **Databases:** PostgreSQL, MySQL, MongoDB, Redis
 - **DevOps & Cloud:** Docker, Kubernetes, AWS, CI/CD, Terraform
 - **Other:** RESTful APIs, GraphQL, Kafka, Elasticsearch, gRPC
-

Professional Experience

Senior Backend Engineer

Tech Solutions GmbH, Berlin, Germany

Jan 2022 – Present

- Led migration to microservices architecture, improving system scalability by 40%.
- Designed and developed REST and GraphQL APIs serving millions of users.
- Integrated CI/CD pipelines with Docker and Kubernetes, reducing deployment time by 60%.
- Mentored junior engineers and conducted code reviews to maintain code quality.

Backend Developer

Innovatech Labs, Munich, Germany

Jul 2018 – Dec 2021

- Built and optimized scalable backend services in Java and Python.
- Collaborated closely with frontend teams to improve API usability and performance.
- Implemented caching strategies using Redis, resulting in a 25% faster response time.

Junior Backend Developer

StartupWorks, Hamburg, Germany

Jan 2017 – Jun 2018

- Supported development of core backend modules and APIs.
 - Wrote unit and integration tests to ensure software reliability.
 - Assisted in database design and query optimization.
-

Education

M.Sc. in Computer Science

Technical University of Munich, Germany

2014 – 2016

B.Sc. in Computer Science

University of Stuttgart, Germany

2010 – 2014

Certifications

- AWS Certified Solutions Architect – Associate
 - Certified Kubernetes Application Developer (CKAD)
-

Projects

- **Scalable Payment Service:** Designed a high-availability payment processing system handling 100K+ transactions daily.
 - **Real-Time Analytics Dashboard:** Built a data pipeline using Kafka and Elasticsearch for near real-time monitoring.
 - **API Gateway:** Developed an API gateway in Go to aggregate multiple microservices with rate limiting and authentication.
-

Languages

- English (Fluent)
- German (Professional Proficiency)

Interests

- Open-source contribution, cloud architecture, and distributed systems research.
